Dear Readers and Contributors,

It is with great desire that we present the proceedings of the International Conference on Innovative Techniques in Artificial Intelligence and Communication Technologies (**ICITAICT 2K24**), held on 12th April, 2024. This conference, organized by the Department of Visual Communication at Sathyabama Institute of Science and Technology, Deemed University, Chennai, India, in association with INTI International University, Malaysia, marks a substantial milestone in the advancement of research and progress in the fields of artificial intelligence and communication technologies.

This conference acknowledged an overwhelming response, with numerous high-quality 246 papers submissions spanning a wide range of topics including, but not limited to, Ai and Film Making, Ai and Content Creation, machine learning, natural language processing, computer vision, wireless communication and IoT. The rigorous peer-review process ensured that only the most impactful and innovative research papers were selected for presentation.

Among 246 papers, 12 were selected for publication in the special issue of the UGC Care-Listed Journal "**ShodhKosh: Journal of Visual and Performing Arts**," titled "**Artificial Intelligence and Communication Technologies**." I extend my heartfelt gratefulness to Granthaalayah Publications for their valuable collaboration with our institution, which has greatly encouraged researchers by providing them with well-deserved recognition.

Finally, we thank all the writers and participants for their contributions and engagement. It is your desire and commitment that make this conference a vibrant forum for innovation and excellence. We hope that **ICITAICT 2K24** will not only enhance your understanding and stimulus new ideas but also pave the way for future collaborations and advancements in the field.

Sincerely,
Dr. N Raja
