

COLOR THERAPY WITH CRYSTALS AND GEMSTONES

Dr.Jyoti Gupta M.H.Sc., M.A., (P.Hd.) Astrology Isha's Institute of Arts & Astropalmistry, 530, Khatiwala Tank, INDORE-14

POSITION OF CHAKRAS IN OUR BODY COLOR THERAPY WITH CRYSTALS AND STONES

What are Gems?

Gems are well-compressed small pieces found in mineral deposits found inside earth. Pearls and amber are notable exceptions in that they are formed from organic materials. Most of the gemstones are crystalline. A crystalline mineral is formed by a distinct 3-dimensional atom and this is a unique characteristic of gemstones. They possess color, hardness, aesthetic beauty, clarity and they

can be cut to give sparkle. According to David Marcum's remarks in his book "The Dow Jones Irwin Guide to Fine Gems and Jewelry":

"A gemstone's origin is locked in the secrets of the formation of the cosmos. Our sun is incapable of creating, through nuclear fusion, elements that are heavier than carbon. Yet, in many stones there exist elements such as chromium, manganese, vanadium and iron. These metals which give emerald its rich green color, the ruby its dazzling red, and sapphire its serene blue, were not created in the sun's nuclear fusion cauldron. Rather they were captured during the formation of our solar system, bits of galactic debris, and the dead remnants of exploded stars and collapsed planetary systems." In today's world, the people are full of stress and strain. We all desire peace, good health and prosperity in life. In medical sciences, there are many alternatives for the control of disorders such as allopathy, homeopathy, Aayurved, yoga, Naturopathy Etc. One of these, is the <u>GEMSTONE</u> therapy, we are going to talk about. This is one of the most ancient & natural science followed in India million years ago. This therapy is harmless and has no side effect, and may solve many physical and psychological problems we are facing nowadays.

The function of **gem therapy** is associated with color energy hence it can also be called as **color therapy**. There is significant influence of colors like blue and red rays on the human body. Some 2000 years ago, color halls were made in many countries where patients used to take color bath for cure of their diseases. It can be said that the colors have a great influence on the system of human chemistry. But, how they exactly function is still being investigated. White light/sun light when passed through prism, radiates seven colors that can be seen clearly. The seven colors red, yellow, green, blue, violet, indigo and orange are of different wavelengths and have different effects on the system of human body. Our solar system has numerous planets, and seven planets are mainly considered in Astrological studies there are two shadow planets also.

PI	<u>LANET</u>	GEMSTONE	COLOR
1)	SUN/SURYA	RUBY	ORANGE
2)	MOON/CHANDRA	PEARL	WHITE
3)	MARS/MANGAL	CORAL	RED
4)	MERCURY/BUDDHA	EMERALD	GREEN
5)	JUPITER/GURU	TOPAZ	YELLOW
6)	VENUS/SHUKRA	DIAMOND	WHITE
7)	SATURN/SHANI	BLUE SAPPHIRE	DARK BLUE

- 8) RAHU
- 9) KETU

These planets represent seven chakras in our body, forming the same planetary system.as these planets affect the whole universe, these chakras are also affected by the planets, and their representative colors. These seven chakras are associated with our specific fingers. The fingers receive rays from the gemstone worn in the form of ring. These centers, although independent, are joined with the main center known as center of Saturn, which is receiver of blue color ray. Therefore, the blue color ray has the most powerful healing capacity.

HOW DOES ASTROLOGY HELP IN COLOR THERAPY

All the planets revolve around the earth at different speeds. As a result, at any moment, all the planets will have a definite position in relation to the earth and the relative position is very important which tells about the blueprint of person born during that specific time. Perfect calculations and accurate predictions based on the study of planetary position at the time of birth is the key to find out excisting ailments and future health problems.

All the chakras should be in proper balance and related colors in appropriate ratio for a healthy well being. White light is present all around us, and so are the colors. to balance the ratio of colors in our body, the related gems are worn. Each finger represents a certain planet. Gemstones are therefore selected as per the need and worn in the specific finger. Sometimes, if more than two chakras are imbalanced, two gemstones are worn together, but, they should be matched well before prescribing. Gem stones and crystals can be worn as a ring, bracelet or a necklace. the above portion of our body is concidered to be clean and so, the ornaments are worn likewise.
